

ANTI-SUBMARINE WARFARE

1-2 DECEMBER
LONDON 2009

Building an ASW capability for current and future threats

Anti-Submarine Warfare 2009, the most comprehensive gathering of high level naval leaders and ASW experts this year, will offer practical ideas and insight into:

- How serious is the future underwater threat?
- What are the latest technological advances in weapons and sensors?
- How is the changing operational environment affecting ASW capability?
- What are the newest and most effective platforms in this field?

“Submarines are more capable and harder to detect than ever. If you are concerned about the current rise in the underwater threat, it's a must to attend this conference.”

Rear Admiral Rainer Brinkmann, Commander, Flotilla I and Director NATO Centre of Excellence for operations in Confined and Shallow Waters, Germany

HIGHLEVEL NAVAL LEADERS AND ASW EXPERTS SPEAKING AT ASW 2009 INCLUDE:

Rear Admiral (Ret'd), Chris Parry, Former Director General, Development, Concepts and Doctrine, **Ministry of Defence, UK**
