

KEEPING YOU **ONE STEP AHEAD**

KEEPING ONE STEP ahead is the key to the successful outcome of an operation. The ability to detect the enemy whilst remaining undetected enables you to act before the opposition. This vital advantage is exactly what you will get from Saab's Naval Electronic Warfare (EW) solutions.

Whether operating on the high seas or in littoral environments, you can rely on our state-of-the-art EW solutions such as tactical ELINT and ESM and Laser Warning systems. System solutions for submarines and surface vessels that not only provide the situational awareness needed to dominate the battle arena, but also give the edge that you may recognise as naval supremacy. ●●●●
